## XOPT

XOPT is a computer aided planning and optimization tool for short, medium, and long term energy disposition in power supply systems (hydro and thermal power plants including co-generation as well as contracts). XOPT supports the planning and optimization of the supply of resource and contract arrangement as well as the use of resources and various contracts (contract management). It can be used for planning periods from one day up to several years. XOPT is part of a wide range of products for the deregulated electricity market.

For further information about this application please contact:
