The GAMS World web site aims to bridge the gap between academia and industry by providing highly focused forums and dissemination services in specialized areas of mathematical programming.

The first topic ready to face the world is the area of Mixed Integer Nonlinear Programming, the MINLP World.

It is the purpose of the MINLP WORLD site to bring people that work with Mixed Integer Nonlinear Programming (MINLP) together.

We are interested in practical software, testing, comparison, and quality of solvers, research in both solution methods and in good model formulations, and in improving the communication between people interested in these topics.
